Software Engineer

Kitchener, ON | 4168361702 | yusuferyilmaz1819@gmail.com | [linkedin.com/in/yusuferyilmaz](https://www.linkedin.com/in/yusuferyilmaz)

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Engineer with 5+ years of experience specializing in advanced Mathematical Logic, **web/mobile application development**, and technical leadership. Expert in **React, React Native, JavaScript, TypeScript, Node.js, Python, Java**, and **AWS**, with a proven track record of leading multi-quarter digital transformations and architecting systems for **200+** enterprise clients. **Currently serving as an Architectural Design Lead at The Age of Light Inc., spearheading the end-to-end frontend and mobile architecture for an AI-driven, cross-platform ecosystem.** Recently spearheaded a complete UI overhaul at MDF Commerce that increased platform efficiency by **80%**. Previously at The Minery, led the full-stack architecture for a nationwide employee tracking application adopted by all Honda and Acura dealerships in Canada, specifically defining core **RESTful API schemas** and building the frontend. Passionate about reducing operational overhead through intelligent automation and delivering scalable, WCAG-compliant solutions in fast-paced **Agile environments**.

WORK EXPERIENCE

Software Developer

The Age of Light Inc | Irvine, CA

Jan 2026 – Present

- **Real-Time AI Streaming & UI:** Engineered ultra-low-latency 60fps **video/audio streaming** using LiveKit WebRTC and HeyGen avatars via **React Native, React JS**, and **Figma** designs, integrating **Google Gemini LLMs, Qdrant semantic search**, and **agentic guardrails**.
- **Serverless Backend, Auth & APIs:** Architected a secure serverless backend on **AWS Lambda** using **Node.js, TypeScript**, and **AWS CDK**, delivering scalable **RESTful APIs** via **DynamoDB** and **SQS**, backed by **JWT** authorization, **AWS Cognito**, and **Google/App Sign-In**.
- **Localization & State Management:** Implemented robust internationalization (**i18n**) supporting 13 different languages for global reach, while optimizing cross-platform global state using **Redux**.
- **Monetization & Analytics:** Integrated cross-platform monetization via **RevenueCat** and **Stripe webhooks**, alongside **Firebase Analytics & Crashlytics** for user activity and real-time error tracking, **FCM** push notifications, and **Microsoft Clarity** heatmaps.
- **DevOps & CI/CD:** Accelerated development using **Claude Code** and maintained **95%+** test coverage through automated **GitHub Actions CI/CD pipelines** and **EAS OTA** deployments.

Software Developer

MDF Commerce | Longueuil, QC

Mar 2023 – Mar 2026

- **UI/UX Transformation:** Spearheaded a complete UI overhaul for the Contract Management Lifecycle (CLM) platform using **React JS**, achieving **WCAG 2.1 accessibility compliance** and increasing overall platform efficiency by **80%**.
- **Dynamic Form Engineering:** Developed and optimized complex contract generation workflows using **Java, XML, XSLT**, and **React**, which improved UI rendering performance by **20%** and enabled dynamic data mapping.
- **Automation Architecture:** Architected a Self-Service Contract Configuration Panel that **eliminated 95% of manual developer intervention** for contract updates and reduced client turnaround time by **40%**.
- **Cloud & Scalability:** Designed mission-critical serverless microservices using **AWS Lambda and API Gateway**, automating complex approval chains and ensuring high availability.
- **System Modernization:** Engineered a seamless **E-Signature** integration (One Span & DocuSign), replacing legacy manual workflows with a fully digital solution.
- **Engineering Excellence:** Enforced high quality standards by establishing **CI/CD pipelines (Jenkins)** and implementing **JUnit tests (90% coverage)**, reducing technical debt by **35%**.

Software Developer

The Minery Ltd | London, ON

Jan 2022 – Feb 2023

- **Full-Stack Architecture:** Led the architectural design (Frontend & API) for a nationwide employee tracking platform adopted by **all Honda and Acura dealerships in Canada**, defining core data schemas and deliverables.
- **Operational Efficiency:** Boosted dealership productivity by **25%** by simplifying complex data workflows into a high-performance interface built with **React.js and Material UI**.
- **Backend Security:** Engineered robust backend services using **Node.js**, implementing secure **Authentication and Authorization** workflows to protect sensitive enterprise data.
- **Mobile Optimization:** Delivered a fully responsive UI architecture that drove a **40% increase in mobile platform usage**, ensuring seamless access across all devices.

Full Stack Developer

Sopcal | Kitchener, ON

Apr 2021 – Jan 2022

- **E-Commerce Development:** Built and scaled a multi-vendor e-commerce platform supporting local businesses, enabling vendors to independently upload images, manage dynamic pricing, and update inventory in real-time.
- **Payment Integration:** Engineered secure payment processing workflows using **Stripe**, ensuring seamless and PCI-compliant transactions for diverse local merchants.
- **Full-Stack Implementation:** Developed robust backend services with **Python (Django)** and highly responsive front-end interfaces using **React.js and Material UI**, creating a cohesive user experience.
- **Security & Mentorship:** Hardened application security to eliminate vulnerabilities and mentored junior developers on code quality, boosting team productivity by **25%**.

Full Stack Developer

Clarusway | Virginia, USA

Apr 2020 – Sep 2022

- **Technical Mentorship:** Mentored cohorts of junior developers on **JavaScript, React.js, and Node.js** fundamentals, conducting code reviews and guiding them through complex problem-solving scenarios.
- **Mobile Application:** Developed a location-based restaurant discovery mobile app using **React Native**, implementing geolocation features to rank and display venues based on user proximity and reviews.
- **Web Application:** Built a dynamic movie recommendation engine using **React.js**, featuring advanced search algorithms and personalized top list curation based on user preferences.
- **API Architecture:** Designed and deployed scalable **RESTful APIs** using both **Node.js and Django**, ensuring efficient data consumption for web and mobile clients within a component-based architecture.

TECHNICAL SKILLS

- **Core Languages:** JavaScript (ES6+), TypeScript, Python, Java.
- **Frontend Ecosystem:** React.js, Redux, Next.js, HTML5, CSS3/SASS, Material UI, Tailwind.
- **Backend & API:** Node.js, Express.js, RESTful APIs, GraphQL, Microservices Architecture.
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda, DynamoDB, API Gateway), Docker, Jenkins, CI/CD.
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase.
- **Testing & Quality:** Jest, JUnit, SonarQube, Postman

EDUCATION & CERTIFICATION

B.Sc. in Computer Engineering – Istanbul Technical University (09/2012 - 08/2016)

B.Sc. in Mathematics Education – Dokuz Eylul University (09/2012 - 08/2018)

Full Stack Development Certification, Clarusway - Full Stack Developer
